

Donkey anti Mouse-HRP

Cat.QYB005

Background:

QualitYard Biotechnology's secondary antibodies are available conjugated to either an enzyme, biotin or fluorophore for use in a variety of antibody-based applications including Western Blot, immunostaining, flow cytometry and ELISA. Secondary antibodies are commonly affinity purified against immobilized whole IgG or against antibody fragments. QualitYard Biotechnology offers an extensive selection of secondary antibodies optimized for immunohistochemistry and flow cytometry, and are labeled with multiple conjugates, including HRP, AP, biotin, FITC, PE, AF488, AF594, AF647, AF680. All these secondary antibodies are specific for commonly used primary antibody species, including mouse, rabbit, goat and rat.

Source:

Donkey anti mouse-HRP is a pre-adsorbed, affinity purified secondary antibody raised in donkey against mouse IgG (H+L) and conjugated to HRP.

Size: 500ul

Antibody concentration: 1mg/ml

Buffer: PBS(pH7.4), with 50% glycerol.

Stablizer: 2mg/ml BSA

Preservative: 0.01% Thimerosal

Suggested Working Concentration:

WB: 1:5000-1:10000

IF/IHC: 1:100-1:500

ELISA: 1:5000-1:10000

Storage: Storage at -20°C. Stable for one year from the date of shipment.

Specificity:

The antibody reacts with mouse whole IgG. The antibody may cross-react with immunoglobulins from other species.

Research Use:

This product is for in vitro research use only, not for diagnostic or therapeutic use.
